

Electrical Part for Forklifts

Forklift Electrical Part - Lift trucks can be purposely marked to be utilized in unsafe places. A labeled lift truck denotes the design has met the least requirements of ANSI/UL 558 used for engine powered lift trucks or ANSI/UL 583 meant for electric lift trucks for the type of label put.

Applications for labeled forklifts could be found in National Fire Protection Association NFPA 505 - Powered Industrial trucks including: Type Designations, Areas of Use, and Maintenance and Operation. Consult your local insurance carrier and Fire Marshall for further information about the permitted uses of industrial powered forklifts in your application.

If the particular forklift satisfies the outlined standards, labels may be put. A labeled lift truck would show the type of designation placed on the nameplate and would have a properly corresponding label put.
