

Barrel Clamps

Barrel Clamp - Called "Barrel Clamp", this particular hydraulic attachment is actually used on lift trucks in order to compress objects which you want to transfer utilizing the lift truck. Normally, they're utilized in order to handle kegs, paper rolls and barrels, together with a few barrel clamp designs being able to rotate the cargo. For instance, the rotate function permits the person operating the forklift to be able to insert a vertically stored paper into the horizontal intake of a printing press.
