

Aerial Work Platforms

Aerial Work Platform - There are numerous attachments designed for forklifts that can be utilized in order to help expand the functionality of your lift truck and allow you to lift objects, handle materials with greater ease or to accomplish clean-up jobs.

Several of the attachments are specially designed so as to fit on the forks themselves. Fork extensions for example, are utilized when you need much more blade length, that increases lifting capacity. Fork extensions come in lengths ranging from forty eight to one hundred twenty inches. Triangular or rounded accessories are another type used whenever moving rolled material to be able to ensure it does not roll off of the standard flat forks.

Examples of lifting attachments include pivoting and telescoping boom or crane attachments. They can come in a number of different kinds and are normally designed for moving lumber, poles, metal bars and other sort of bulky things. Other accessories such as other styles of hooks and hook plates are available to pick up objects making use of a sling or chain. Slab lifters and magnetic lifters are other objects which can be used along with hook attachments. Slab lifters are specialized accessories that are utilized for carrying different materials that are delivered in a slab or sheet format. Rug rams or carpet poles are other lifting tools which connect to your forklift to be able to make moving rolls of carpet a lot easier. The attachment connects onto the lift truck's forks and has a pole which goes through the center of the carpet roll.

There are numerous other kinds of lift truck accessories which could be utilized for facility maintenance like snow blades. These forks attach to front end loaders and could transfer materials like for example dirt, soil and snow. Other popular cleanup attachments include standard sweepers and magnetic sweepers. Standard sweepers consist of a broom which the lift truck forks hook onto for sweeping large spaces like for instance parking lots or warehouse and factory floors. The magnetic sweeper is the same except that it has a magnetic plate rather than bristles. The magnetic sweeper is used in areas where there is lots of metal fragments like on shop floors for instance. Sweepers have widths as much as sixty inches and this surface area makes clean up quick and effortless.

A material spreader is another forklift accessory which is often used at facilities. These spreaders are handy for a range of applications like spreading pellets, fertilizers, insecticides, seeds, ice melt and rock salt.

Another optional lifting attachment are work platforms. These could be used by several various businesses daily. Platforms may range in size from 36" x 36" to up to 60" x 60". Several models may be existing and are capable of folding up and storing into a smaller place. Work platforms are designed to raise employees up to an overhead location making use of the forklift. Larger platform models have added space for staff to be able to bring tools and other necessary stuff meant for the job. Usually work platforms are constructed of steel or ploy material.
