

JLG Forklift Parts

JLG Forklift Parts - After retiring in the late 1960's, John L. Grove started out on a cross country RV trip. After spending many years establishing his family built crane company with his brother, John had no idea that this trip would give birth to the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision materials handling equipment was the end consequence of a road trip.

Whilst on their trip, John spent time talking to former business contacts whom the Groves stopped to see along the way. These conversations combined with a tragic event-two workers being electrocuted on scaffolding when the Groves were going to the Hoover Dam- John uncovered a considerable marketplace for a product that could promptly and safely elevate people in the air to accomplish upkeep and other building services.

Upon returning from their travels, John formed a partnership with two friends and bought a metal fabricating business in McConnellsburg, Pennsylvania. In 1970, starting operations with a crew of twenty employees, they created and sold the first JLG aerial work platform. The company incorporates some of the basic design elements of that original lift into existing versions.

Since then, JLG Forklifts have come a long way from when Mr. John L. Grove came back from his fatefull cross-country journey and since the first JLG aerial platform entered the market. As of today, the company has extended itself into a number of global markets and continues to develop modern equipment to guarantee that customers are able to become safer and more well-organized within their workplace.
